CAREER OBJECTIVE

Backend-focused .NET Software Engineer with 4 years of experience building and maintaining scalable, reliable, and maintainable backend systems. Experienced in ASP.NET Core, SQL Server, RESTful APIs, Microservices, RabbitMQ, gRPC, third-party integrations, CI/CD, and production troubleshooting. Strong understanding of clean architecture, software design principles, and maintainable code, with a focus on delivering technical solutions that align with business requirements.

TECHNICAL SKILLS

- **Programming Languages:** C#, JavaScript, TypeScript
- **Backend:** ASP.NET Core, Web API, Entity Framework Core, Dapper, Razor
- **Frontend:** React.js, Astro, Svelte
- **Architecture & Backend Concepts:** RESTful APIs, Microservices, Multitenancy, OOP, SOLID Principles, Design Patterns, Clean Architecture
- **Messaging & Communication:** RabbitMQ, gRPC, SignalR
- **Databases & Caching:** SQL Server, MySQL, PostgreSQL, Redis
- **DevOps & Infrastructure:** Docker, Jenkins, GitHub Actions, Linux
- **Tools / Platforms:** Quartz Scheduler, Elsa Workflows, Ocelot, YARP, DocuSign, Amazon S3, SigNoz
- **Familiar with:** Python, Java, Spring Boot, Kubernetes (K3s), Traefik, Nginx, Helm, Argo CD

PROFESSIONAL EXPERIENCE

BLogic Systems - BLogic Dashboard (6 members)

Mar 2025 - Present

- **Description:** BLogic Dashboard is a support application designed for **POS systems**. It helps agents manage merchants through a **hierarchical model**, create support tickets, and generate registration forms using **DocuSign**. It also integrates with external systems such as **TSYS** to handle **legal documentation**.
- **Technologies:** ASP.NET Core, RESTful APIs, API Versioning, Entity Framework Core, Dapper, Razor, SignalR, Quartz Scheduler, RabbitMQ, DocuSign, SQL Server, Design Patterns, Amazon S3, SigNoz, Webhooks
- **Responsibilities:**
 - Analyzed business requirements and developed backend features using ASP.NET Core, Entity Framework Core, Dapper, and SQL Server.
 - Designed database structures and optimized SQL queries to improve application performance and maintainability.
 - Integrated TSYS and DocuSign services to support merchant onboarding, document processing, and external system workflows.
 - Implemented asynchronous and scheduled processing using RabbitMQ and Quartz Scheduler.
 - Automated build and deployment processes using Jenkins on Linux servers.
 - Investigated and resolved production issues and contributed to improvements in system reliability and scalability.

- **Description:** WECRM is a customer relationship management (CRM) platform for automotive dealerships, supporting vehicle lifecycle management, customer tracking, and maintenance service reminder workflows.
- **Technologies:** ASP.NET Core, Entity Framework Core, Dapper, SQL Server, RESTful APIs, Microservices, RabbitMQ, gRPC, Ocelot API Gateway, Elsa Workflows, Quartz Scheduler, Multitenancy, Design Patterns.
- **Responsibilities:**
 - Analyzed business requirements and developed backend features for dealership and customer management workflows.
 - Developed and maintained backend services using ASP.NET Core, Entity Framework Core, Dapper, and SQL Server.
 - Implemented inter-service communication and background processing using RabbitMQ, gRPC, Elsa Workflows, and Quartz Scheduler.
 - Optimized SQL queries and refactored backend code to improve performance, maintainability, and reliability.
 - Investigated and resolved issues related to vehicle lifecycle management, customer tracking, and maintenance reminder workflows.

- **Description:** Promotion Planning is a pricing management system in the manufacturing domain that enables businesses to plan, manage, and optimize product pricing and promotional strategies for supermarket chains across Australia and New Zealand.
- **Technologies:** ASP.NET Core, Entity Framework Core, Dapper, SQL Server, RESTful APIs, Ocelot API Gateway, Azure Pipelines, IIS, SharePoint, Design Patterns.
- **Responsibilities:**
 - Enhanced authentication and access control mechanisms to improve system security and reliability.
 - Optimized backend logic, SQL queries, and reporting processes, reducing report generation time by approximately 30%.
 - Refactored backend code and improved API performance to enhance system maintainability and responsiveness.
 - Integrated SharePoint for file storage and document management within business workflows.
 - Mentored and provided technical guidance to 2 team members, supporting feature delivery and code quality improvements.
 - Supported CI/CD automation and production deployments using Azure Pipelines and IIS.

LANGUAGES & SOFT SKILLS

English: TOEIC 535 (Listening & Reading); basic English communication.

Soft Skills:

- Teamwork and collaboration.
- Problem-solving and adaptability.
- Planning and time management.
- Communication and presentation skills.
